PROFESSIONAL SUMMARY

Software development professional with a track record of producing reliable code and contributing to project success. Known for collaborative teamwork and result driven approach in dynamic environments. Skilled programming languages and adept at communicating technical concepts

EDUCATION

03/2021 - 05/2025 **Bachelor of Science(Honours): Computer Science**

Belgium Campus ITVersity - Pretoria, South Africa

NQF Level 8

11/2019 **High School**

Lowveld High School - Mbombela, Mpumalanga

National Senior Certificate

SKILLS

Technical-skills

C#	MS SQL Management
React JavaScript	Mongo DB
ASP. Net core	UX/UI Desing
Java	Rest API
Python	

Soft-skills

Time Management
Communication Skills
Critical Thinking
Git version control
Documentation
Database Management

WORK HISTORY

01/2025 to Current **Software Engineer**

Altron Healthtech | Woodmead, Sandton

As a Junior Software Engineer, I worked on a project that began with analyzing a manual SQL process used to update customer details and evolved into a broader effort to assess the system and automate related workflows.

01/2024 to 01/2025 **Graduate Software Developer**

Altron Healthtech | Woodmead, Sandton

I completed training in React, TypeScript, and Redux, building a strong foundation in modern front-end development. I applied these skills on assigned tasks that reinforced my state management, component design, and scalable UI development. I was responsible for developing ASP.NET Core backend, strengthening my understanding of microservice architecture and APIs.

03/2022 to 11/2023 **Peer Tutor**

Belgium Campus ItVersity | Pretoria

I supported students facing challenges in programming, Linear Programming, and Machine Learning through tutoring sessions. I focused on strengthening their understanding of core concepts, resulting in their improved academic performance.

01/2020 to 11/2021 **Volunteer Database Assistant**

DataBox | White River

Volunteered at Data Box, where I gained hands-on experience working with Microsoft SQL Server databases. Assisted in developing stored procedures, views, and other database objects to support business processes.
